Ca Calcium

425 ppm

Target: 400–450

GOOD

Mg Magnesium

1320 ppm

Target: 1250–1400

GOOD

OVERALL WATER STATUS

ATTENTION

One test parameter requires attention. Refer to the store-approved next steps and arrange follow-up testing.

All values are illustrative. Targets and status ranges depend on the retailer's configured aquarium profile.

WHAT NEEDS ATTENTION

1. Phosphate reading

Phosphate is slightly above the illustrative target range for this profile.

2. Review aquarium history

Discuss feeding and recent aquarium changes with your retailer.

RECOMMENDED ACTIONS & PRODUCTS

Speak with your retailer

Use only instructions recorded on the current, store-issued report.

Follow-up water test

Arrange a retest according to the store's guidance.

Recommended next steps are store-approved

DOSING PLAN
